Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-16 and 33-36, drawn to a sound absorbing shield, classified in class 49, subclass 502.
- II. Claims 17-31, drawn to a method of forming a shield, classified in class 427, subclass 488.
- III. Claim 32, drawn to a method of sealing a door, classified in class 49, subclass 506.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product as claimed can be made by another and materially different process such as first attaching a polymer film to a first side of a sound absorbing material and then form a plurality of perforations and hollow protrusions in the polymer film.

Inventions III and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the apparatus as claimed can be used to practice another and materially different process such as first providing a sheet of sound absorbing material,

then providing an adhesive around the periphery of the sound absorbing material, and then attaching the sound absorbing material to a vehicle door.

Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are the claims of group II are directed towards a method of forming a shield and the claims of group III are directed to a method of sealing a door.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication should be directed to Jerry Redman at telephone number 703-308-2120.
